# About Us

## Who we are?

**ALORA ECO PRODUCTS SDN BHD** is determined to become a new healthy nature manufacturer for the packaging in foods industries. Although this project is profit oriented but the main objective of this company is to produce products that can save the environment. In addition, we also want to educate the public regarding the dangers of continued use of polystyrene which adversely affect our earth. Therefore, we view the company as a business opportunity that has a high prospect in the future to produce alternative products, namely the use of sheath of areca nut as the main material to produce food packaging. This product is 100% biodegradable hence its safe and also has high environmental value. The overall is also targeted in increasing of Areca Palm plantation. The overall development of this business will also provide job opportunity to many youths in the field.

## Our Mission

“Our mission is to achieves the high income high value company by TN 2050.”

## Our Vision

“Our vision is to become - an established, dynamic environmental friendly company.”

# Our Products

What we sell?

**Alora Eco Green** products are earth-friendly plates that are not treated with any chemicals. They stand up hot food and liquids. Our products won't impart a taste and acts as a natural insulator indoors or outdoors. Our products are suitable for gatherings, parties, weddings and even for daily usage for those of you who would like to save water and earth!
